PROFESSIONAL SUMMARY

Developer with experience in building web and mobile applications, focusing on creating real-life utility tools such as expense trackers, video downloaders, and document converters. Actively integrates AI tools and large language models into development workflow to enhance efficiency and code quality. Eager to learn new technologies and currently seeking an internship to gain professional experience in a dynamic team environment.

TECHNICAL SKILLS

Languages & Frameworks

HTML | CSS | Java | Python | Flutter

Backend & Database

Firebase | Firestore

Tools & Technologies

Git & GitHub | AI Tools & LLMs | Static Websites | Portfolio Sites

KEY PROJECTS

BachatGuru — Flutter | Firebase

Developed a mobile expense tracker application allowing users to manage personal finances efficiently with real-time data storage and synchronization across devices.

All-in-One Downloader — Web Technologies

Created a web-based utility tool designed for downloading media content from various online platforms, providing a seamless user experience.

Image and PDF Tools — Python | Java

Built utility software for converting, adjusting, and managing image and PDF documents, streamlining document processing workflows.

FREELANCE EXPERIENCE

Web Development Freelancer

Developed static and portfolio websites for various clients, leveraging AI-assisted development workflows to accelerate delivery and enhance code quality. Successfully delivered multiple projects meeting client specifications and deadlines.

CAREER GOALS

Seeking a challenging internship opportunity to gain hands-on professional experience and grow as a developer in a collaborative team environment. Particularly interested in roles that involve integrating AI solutions into innovative projects and working with modern development frameworks.
